Profile

Analytical Full-Stack Web Developer and Technical Lead with a strong foundation in structured project management, UML system design, and product modeling. Proven track record of managing full application lifecycles from initial user-problem discovery to successful deployment. Combines solid engineering logic (Next.js, Node.js, Java DSA) with a keen aesthetic sensibility to build high-performance products, drive cross-functional alignment, and solve complex, ambiguous problems.

Technical Skills

Languages: Java, Python, TypeScript

Web Technologies: Next.js, React, Node.js, Express.js, Three.js, REST API, GraphQL

Databases: MongoDB, MySQL

DevOps & Frameworks: Agile/Scrum, Jira, UML Modeling, Docker, Jenkins, Git — **Other domains:** Data Science

Projects

Campus Connect

Aug 2023 – Oct 2023

Full Stack Developer & Product Owner

[Live Link](#)

- Conceptualized, designed, and launched a secure, private networking platform to solve peer-to-peer collaboration gaps for students.
- Managed the end-to-end product implementation using Next.js and MongoDB, optimizing database queries to enhance platform scalability.
- Awarded **1st place** at the CIT Project-Exhibit out of numerous competing engineering and product initiatives.

Virtual Bookshelf

Sep 2023 – Oct 2023

Full Stack Developer

[Live Link](#)

- Architected a relational database management web application using Next.js, TypeScript, and MySQL to streamline book inventory cataloging.
- Translated administrative user requirements into precise data models and workflows, ensuring optimal data integrity and sub-second query performance.
- Designed a responsive, user-centric interface focused on clear typography, pixel-perfect layouts, and intuitive interaction patterns.

Open Source Contributions

- **MDN Web Docs (Content)**
 - Updated WebGL 1 specifications by correcting parameter definitions for `bufferSubData` ([#42411](#)).
 - Revised HTTP documentation to update `Prefer` header syntax rules allowing list structures ([#42575](#)).
 - Resolved internal glossary validation issues by correcting broken redirect paths ([#42576](#)).
- **NumPy**
 - Refactored `test_io.py` to ensure explicit UTF-8 encoding across test environments while restoring vital binary-mode regression checks ([#30724](#)).
 - Cleaned up core project configuration infrastructure by removing obsolete Doxygen documentation tags ([#30550](#)).

Education

Cambridge Institute of Technology

Bengaluru, India

B.E. in Computer Science (Affiliated to VTU, NAAC 'A+' Accredited)

Sep 2021 – May 2025

CGPA: 7.7 / 10.0

Achievements & Leadership

- **President**, Innov8 Club, Cambridge Institute of Technology Aug 2024 – Present
 - Leading cross-functional student teams to orchestrate large-scale technical workshops, bootcamps, and high-intensity hackathons.
- **Web Developer Volunteer**, Google Developers Group (GDG) on Campus Present
 - Gathering user feedback to iteratively improve registration workflows, maximizing engagement metrics for regional tech events.
- **2nd Runner Up** – Omni-Bot, Codesprint 3.0 Hackathon, NMIT Apr 2025
- **1st Place** – Campus Connect, Mini-Project Exhibit, CIT Oct 2023

Certifications

- **Programming using Java** – Infosys Nov 2024 – Dec 2024
- **Python for Data Science** – NPTEL Jul 2023 – Aug 2023
- **Front End Web Development Certificate** – Infosys Apr 2023 – May 2023
