Profile

Computer Science Engineering student focused on full-stack and backend development, with hands-on experience building and deploying web applications using React.js, Next.js, Node.js, Express.js, MongoDB, and Redis. Experienced in developing REST APIs, authentication systems, real-time applications, and scalable backend architectures. Strong foundation in problem-solving, system design, and collaborative software development.

Technical Skills

Programming Languages: Java, Python, C, JavaScript
Frontend Development: HTML5, CSS3, React.js, Next.js, Tailwind CSS
Backend Development: Node.js, Express.js, REST APIs
Authentication & Security: JWT, OAuth2.0, Role-Based Access Control
Databases: MongoDB, MySQL, Redis
Developer Tools: Git, GitHub, Docker, Postman

Projects

Campus Connect Aug 2023 – Oct 2023

Full Stack Developer & Product Owner

[Live Link](#)

- Conceptualized and developed a private student networking platform to facilitate peer-to-peer collaboration.
- Managed the complete development lifecycle from requirements analysis and system design to development, testing, and deployment using Next.js and MongoDB.
- Awarded **1st place** at the CIT Project-Exhibit among competing engineering and product initiatives.

TaskPulse

Jun 2026 – Present

[Live Link](#)

- Built a full-stack project and task management platform using Node.js, Express.js, MongoDB, and Redis, with modular MVC architecture for maintainable backend development.
- Implemented JWT authentication, Google OAuth, role-based access control, secure email invitations, and AWS S3 storage.
- Integrated Socket.IO for real-time updates and deployed the application on Render.

Open Source Contributions

- **MDN Web Docs (Content)**
 - Corrected WebGL 1 specification parameter definitions in `bufferSubData` documentation `bufferSubData` ([#42411](#)).
 - Revised HTTP documentation to update `Prefer` header syntax rules allowing list structures ([#42575](#)).
 - Resolved internal glossary validation issues by correcting broken redirect paths ([#42576](#)).
- **NumPy**
 - Cleaned up core project configuration infrastructure by removing obsolete Doxygen documentation tags ([#30550](#)).

Education

Cambridge Institute of Technology Bengaluru, India

B.E. in Computer Science (Affiliated to VTU, NAAC 'A+' Accredited)

Sep 2023 – Sep 2027

CGPA: 7.7 / 10.0

Achievements & Leadership

- **President**, Innov8 Club, Cambridge Institute of Technology Aug 2024 – Present
 - Led technical initiatives focused on innovation, patent awareness, and student technology engagement.
- **Web Developer Volunteer**, Google Developers Group (GDG) on Campus Present
 - Contributed to event registration workflows and used participant feedback to improve user experience and engagement.
- **2nd Runner Up** – Omni-Bot, Codesprint 3.0 Hackathon, NMIT Apr 2025
- **1st Place** – Campus Connect, Mini-Project Exhibit, CIT Oct 2023

Certifications

- **Developing Back-End Apps with Node.js and Express** – IBM Sep 2026
- **Building with the Claude API** – Anthropic Jul 2026
- **Deloitte Australia – Data Analytics Job Simulation** – Forage Jul 2026
